PROFESSIONAL SUMMARY

Computer Science graduate (B.Sc., 2026) and Data Analysis Intern with applied experience across Python, R, SQL/RDBMS, and NoSQL (MongoDB) for data extraction, modelling, and analysis, plus Power BI and Tableau for visualization and reporting. Built an AI-powered demand forecasting engine and a customer-facing analytics platform in a B2C retail environment, and an explainable NLP-based scoring and ranking model for candidate evaluation. Comfortable moving between statistical/quantitative analysis, database development, and translating technical findings for non-technical stakeholders. Intellectually curious, structured problem-solver eager to build a career in analytics consulting.

CORE SKILLS

Predictive Modelling & Demand Forecasting • Statistical & Quantitative Analysis • SQL/RDBMS & NoSQL (MongoDB) • Data Mining & Data Management • Data Visualization (Power BI, Tableau) • Advanced Programming (Python, R) • Database Design & Query Optimization • Report Automation & KPI Tracking • Technical Communication to Non-Technical Audiences

TECHNICAL SKILLS

Programming: Python (advanced), R, SQL, JavaScript, PHP, HTML/CSS
Python Frameworks & Libraries: pandas, scikit-learn, Streamlit, Sentence Transformers, TF-IDF/Cosine Similarity
Databases: SQL/RDBMS (MySQL), NoSQL (MongoDB) — schema design, joins, subqueries, query optimization
Data Visualization & BI: Tableau, Power BI, DAX, Power Query, MS Excel (Pivot Tables, VLOOKUP, Dashboards)
Techniques: Predictive Modelling, Demand Forecasting, Data Cleaning & Preprocessing, Data Mining, KPI Tracking, Query Optimization
AI Tools: ChatGPT, Claude, Perplexity AI, Kimi AI — for research, prompt engineering, and AI-assisted analytics workflows

EXPERIENCE

Data Analysis Intern — Cognifyz IT Solutions Pvt. Ltd. | Sep 2026 – Oct 2026

- Completed a one-month Data Analysis Internship, taking on assigned data analysis tasks and new challenges with enthusiasm and a strong willingness to acquire new skills quickly.
- Recognized in the internship completion certificate for dedication, coordination, effective communication, and attention to detail while working with a team.

PROJECTS

RetailFlow AI — B2C Retail Analytics & Demand Forecasting Platform
Personal Project | Python, MySQL, SQL, JavaScript, Chart.js | Live Demo | GitHub

- Built a role-based (Admin/Staff) retail management platform in a B2C-oriented environment, working directly with customer, product, billing, and sales data on a relational MySQL database.
- Engineered a predictive demand forecasting module estimating 7- and 30-day product-level demand, feeding an auto-generated restock queue — translating historical sales data into an operational business decision.
- Designed a Chart.js KPI dashboard and GST-compliant billing system, applying data mining and query optimization to keep reporting fast and accurate as transaction volume grew.

Blinkit Sales Dashboard — Retail Performance Analytics
Personal Project | Power BI, Tableau, Excel, Power Query, DAX

- Analyzed sales, profit, quantity, and discount performance across cities and outlet types, building an interactive dashboard with KPI cards and a profit-target gauge using Power Query and DAX.
- Applied data visualization principles to surface actionable insights for non-technical stakeholders, practicing the same reporting approach in Tableau for comparison.

HireRank AI — Explainable Predictive Scoring & Ranking Model
Personal Project | Python, Sentence Transformers (NLP), scikit-learn, Streamlit | Live Demo | GitHub

- Designed a weighted, explainable predictive scoring model (semantic similarity, skill match, experience, education) to rank candidates against a job description — prioritizing transparent, reproducible outputs over black-box predictions.
- Deployed as an interactive Streamlit application with structured CSV/JSON export for downstream analysis.

EDUCATION

B.Sc. Computer Science — ASM CSIT College, Pimpri, Pune (SPPU) | 2026 | 7.63 CGPA
HSC — Science (PCMB), S.B. Patil Science & Commerce College, Ravet, Pune | 2023 | 57.50%
SSC — Maharashtra State Board, Lions Club English Medium School, Dehuroad, Pune | 2021 | 68.80%

CERTIFICATIONS

- Getting Started with Generative AI — IBM SkillsBuild, Jul 2026
- Working in a Digital World: Professional Skills — IBM SkillsBuild, Mar 2024
- Information Technology Fundamentals — IBM SkillsBuild, Mar 2024

SOFT SKILLS

Communication • Intellectual Curiosity • Problem Solving • Analytical Thinking • Team Orientation • Leadership • Decision Making
